

# Jueun Kim

[jueunkim@kaist.ac.kr](mailto:jueunkim@kaist.ac.kr) | [kjeiun.github.io](https://kjeiun.github.io)

## EDUCATION

### KAIST AI

*M.S. in Artificial Intelligence, Advisor: Prof. Chulhee Yun*

### Yonsei University (4.09(4.12)/4.3, 3rd/62)

*B.S. in Computer Science, Double Major in Mathematics*

Seoul, Republic of Korea

*Mar 2026 – Present*

Seoul, Republic of Korea

*Mar 2021 – Feb 2026*

## EXPERIENCE

### Research Intern (Advisor: Prof. Chulhee Yun)

*Jun 2025 – Feb 2026, KAIST AI*

- Edge of Stability, Loss landscape, Optimization.

### Research Intern (Advisor: Prof. Youngwoon Lee)

*Jul 2024 – Aug 2024, Yonsei AI*

- 3D World Model for Robot Manipulation.

### Research Intern (Advisor: Prof. Eunho Yang)

*Jun 2023 – Sep 2023, KAIST AI*

- Joined a 3D video generation with 2D Stable Diffusion and neural implicit reconstruction models.

### Visiting Scholar

*Dec 2023 – Feb 2024, Purdue University*

- 3D visual implicit RGB-SLAM.

## PUBLICATIONS

### AMUSE: Anytime Muon with Stable Gradient Evaluation

NeurIPS 2026

- **Jueun Kim**, Baekrok Shin, Jihun Yun, Beomhan Baek, Minhak Song, and Chulhee Yun.
- **Spotlight Presentation** (292 selected from 30,709 submissions; 0.95%).

## AWARDS AND HONORS

### Great Honor (Top 3%)

2025-1

*Yonsei University*

### Highest Honor (Top 1%)

2024-1

*Yonsei University*

### Honor (Top 10%)

2023-2

*Yonsei University*

### Great Honor (Top 3%)

2022-1

*Yonsei University*

### Merit-based Scholarship

Dec 2022, Jan 2023, March 2023, Dec 2023, June 2024, June 2025

*Yonsei University*

## PROJECTS

### RGB-SLAM | *Python, Pytorch*

December 2023 – February 2024

- Worked on dense, visual SLAM (Simultaneous Localization and Mapping). Changed the model architecture of RGB-D visual SLAM into RGB visual SLAM, removing the requirement for depth data.

### Meetable | *React, JavaScript, CSS*

September 2023 – May 2024

- Developed a website for making appointments among many people and for a personal calendar.
- [Link for Meetable](#)

### WakeUpFromNightmare | *OpenGL, C++*

March 2024 – June 2024

- OpenGL-based horror game. User must escape the room after finding three keys.
- [Link for the video demo](#)

### 3D Conditioned Relighting | *Python, Pytorch*

May 2023

- Combined S3-NeRF (Neural Reflectance Field from Shading and Shadow under a Single Viewpoint) and SDPS-Net (Self-calibrating Deep Photometric Stereo Networks) for a single-view multi-light relighting task under unknown lighting conditions. Participated in YAICON, an internal academic contest.

## RELEVANT COURSEWORK

---

### **Deep Learning**

Computer Vision, Machine Learning, Linear Algebra, Mathematical Problems in Deep Learning, Natural Language Processing, Reinforcement Learning

### **Programming**

Object-Oriented Programming, Data Structures, Logic Circuit Design, Software Engineering, Operating System, Architecture of Computer, Computer Graphics

## TECHNICAL SKILLS

---

**Languages:** Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS

**Frameworks:** OpenGL, React, Pytorch, Tensorflow
